

Reduce Food Waste by Extending Shelf-Life, Naturally

April 26, 2023

Jefferson, GA

World Technology Ingredients, Inc. (WTI), a global leader in the functional food ingredient industry, is pleased to announce the release of its latest paper titled "Reduce Food Waste by Extending Shelf-Life, Naturally." This paper sheds light on innovative ways to combat food waste by extending shelf-life and enhancing safety, all through the utilization of WTI's naturally-derived functional food ingredients.

Food waste is a pressing global issue, with staggering amounts of food discarded every year. WTI's vinegar and lemon juice-based ingredients preserve food, prolong shelf-life, enhance safety, and protect consumers from foodborne illnesses. By incorporating WTI's ingredients, food manufacturers, restaurants and food service companies have more satisfied customers, mitigate supply chain risk and reduce food waste, all in a truly sustainable way.

To access the full paper and learn more about how WTI's naturally-derived functional food ingredients can contribute to the reduction of food waste, please visit www.wtiinc.com/reduce-food-waste.

About World Technology Ingredients, Inc. (WTI)

WTI has been leading the functional food ingredient industry for over 30 years. With a passion for innovation, sustainability, and food safety, WTI develops and manufactures naturally-derived ingredients that enhance the quality, shelf-life, and safety of food.
